CHIRASIN CHUENTHED

SOFTWARE ENGINEER | REACT • JAVASCRIPT • ENTERPRISE WEB PLATFORMS

Bangkok / Pathum Thani, Thailand | 061-775-9598 | frongand1998@gmail.com | github.com/frongand1998

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience delivering enterprise web applications across airline cargo, workforce and patrol operations, registration workflows, and real-time IoT platforms. Frontend specialist in React and JavaScript with experience in TypeScript, GraphQL and REST APIs, Socket.IO, CCTV, GIS maps, complex forms, and multi-workspace deployments. Experienced in taking ownership of existing codebases and carrying shared platforms across customer environments.

TECHNICAL SKILLS

Frontend	React, JavaScript, TypeScript, Vite, HTML, CSS, styled-components, Tailwind CSS, Ant Design, Material UI
Application engineering	Redux Toolkit, Recoil, React Hook Form, reusable components, dynamic forms, role-based UI, dashboards, micro-frontends
APIs and data	GraphQL, Apollo Client, REST APIs, Socket.IO, Axios, PostgreSQL, MySQL, MongoDB
Maps, media and delivery	ArcGIS JavaScript API, Leaflet, Three.js, Chart.js, WebRTC / CCTV playback, Docker, Git, Jira, Figma

PROFESSIONAL EXPERIENCE

SKY AI COMPANY LIMITED

2024 – Present

Software Engineer, Frontend / Full Stack

MDSS — Smart Operations Platform

Real-time IoT, facility monitoring and incident management at city and enterprise scale.

- Owned incident workflows, notifications, time-series dashboards, device-status views and workspace-scoped Socket.IO updates for deployments including BMA (approximately 72,000 IoT devices).
- Developed Leaflet and ArcGIS 2D/3D maps with clusters, floor and device views, GLTF scenes and status-driven controls.
- Implemented CCTV live view and playback, video-wall configuration and incident integration.

MDSS — Configuration and Administration

Administration for devices, users, workspaces, permissions and platform behavior.

- Built asset and workspace management, user groups, audit logs, notification settings and corrective/preventive work-order flows.
- Created face-enrollment and import/export flows, configurable widgets and shared form/table patterns with GraphQL mutations.

PROFESSIONAL EXPERIENCE CONTINUED

METTHIER CO., LTD.

25 Oct 2023 – 2024

Software Engineer, Frontend

Workforce Management and Digital Transfer

Enterprise workforce operations and paperless registration.

- Contributed to scheduling, attendance, task and permission workflows for security, cleaning and cash-in-transit operations serving 30,000+ personnel.
- Built candidate registration and criminal-record verification interfaces with validation, document handling and administrative review.

MDSS — Early Platform Development

Initial smart-operations and facility workflows for customer workspaces.

- Contributed to incident monitoring, IoT dashboards, configurable workspace features and shared frontend modules.
- Built 2D/3D facility and device views, operational forms and administration flows.

SKY ICT PUBLIC COMPANY LIMITED

23 Jun 2021 – 25 Oct 2023

Software Engineer

CargoWork — AOTGA Cargo and Warehouse Management

Airline cargo and warehouse React application.

- Built inbound/outbound booking, airway bills, flight preparation, shipment handling, warehouse services, delivery orders and e-weight slips.
- Implemented invoices, receipts, payment terms and reporting; integrated GraphQL/REST, permissions and file/PDF workflows.

Metthier Open Platform and Patrol Operations

Metthier-branded product work delivered during the SKY ICT employment period.

- Contributed to a single-spa shell, shared navigation, authentication and workspace-aware permissions.
- Built patrol checkpoints, schedules, checklists, reports, QR-code printing, uploads and GraphQL CRUD flows.

PERSONAL RESEARCH AND PROTOTYPING

Independent Web Research Repository — Ongoing. Explore application architecture, state management, UI patterns, APIs, visualization and automation in personal prototypes, applying useful findings to production delivery.

ENGINEERING STRENGTHS

Codebase ownership: Maps unfamiliar modules, dependencies, data flows and business rules to continue delivery without unnecessary rewrites.

Enterprise frontend delivery: Builds maintainable interfaces for forms, permissions, maps, CCTV, operational dashboards and real-time state.

Cross-team collaboration: Works with backend, QA, product and operations on APIs, defects, releases and customer requirements.

EDUCATION

Bachelor of Computer Engineering, GPA 2.79 | Srinakharinwirot University, Thailand
